

Dylan Pieper

Data Scientist

Personal Information

He/Him
Madison, Wisconsin
dylanpieper@gmail.com
<https://dylanpieper.github.io/>

Core Competencies

Soft Skills

Cross-functional Collaboration,
User Support & Feedback,
Technical Communication,
Data Strategy &
Roadmap Planning,
Interviewing,
Writing Documentation

Data Tools

R, Python, Quarto, Shiny, D3,
Posit Connect, Qualtrics, Tableau,
Package and API Development,
Application Development,
LLM Applications

Infrastructure Tools

SQL, REDCap, Git, GitHub, Sentry,
Docker, Azure, Microsoft Foundry,
Linux (including RHEL)

Experience

Research Analyst - Collective for Innovation, Scholarship, and Research in Undergraduate Medical Education (CISR-UME), School of Medicine and Public Health, University of Wisconsin-Madison

Nov 2025 - Present

- Lead data analytics to support teaching faculty and staff with innovations in medical school curricula and assessment using evidence-based practices
- Developed R and Python scripts to generate data reports and transcribe videos using OpenAI's Whisper model and natural language processing
- Process data using LLMs on a Linux Azure VM ("Platform X") and Microsoft Foundry, including first pass grading on open-ended responses and generating formative feedback on objective structured clinical examinations (OSCEs)
- Build and deploy research applications to support and promote projects, including a Medical Education Research Hub on Posit Connect (<https://connect.doit.wisc.edu/meded-research-hub>)
- Write grant proposals for the Wisconsin Partnership Program, Macy Foundation, and National Board of Medical Examiners
- Build cross-unit fluency in operational tools and processes spanning the Medical Education Office and Informatics and Information Technology, mobilizing campus resources to coordinate work across teams.

Data Scientist - School of Pharmacy, University of Pittsburgh, Pittsburgh, PA

Sep 2021 - Oct 2025

- Led data strategy and technical roadmaps for grant projects with researchers, technical assistance specialists, healthcare providers, public officials, and IT departments
- For a project funded by the state, used multilevel modeling to predict risk factors for treatment retention across the 250+ treatment center network, designed REDCap integrations of electronic medical records, and built automated ETL workflows in R and DuckDB
- For a project funded by Arnold Ventures, used multilevel modeling to predict racial disparities in pretrial bail decisions, adjusting for key covariates, and built interactive D3 Sankey visualizations of case outcomes across courts from arraignment through sentencing
- Contributed to mixed-methods evaluation, integrating qualitative data from key informant interviews (with district attorneys and judges) conducted by evaluators alongside quantitative analysis and psychometrics

Experience

- Developed and deployed survey applications, automated Quarto reports, and Shiny dashboards across projects, and engineered SQL databases linking clinical, operational, and geographic data
- Promoted data tool adoption through technical documentation and dissemination, expanding reach from project partners to broader research communities
- Contributed to training junior data staff, including recruitment, professional development, and mentorship

Field Interviewer - NORC, University of Chicago, Chippewa Falls, Wisconsin

Aug 2021 - Nov 2021

- Conducted structured interviews with research participants across diverse geographic locations, building rapport and ensuring high-quality data collection using standardized survey instruments and protocols
- Managed project coordination and logistics including scheduling, travel planning, and participant communication to ensure successful data collection across assigned geographic areas
- Maintained strict data governance and research ethics standards, ensuring confidentiality and security protocols throughout the participant interactions

Research Specialist - Michele Gelfand's Culture Lab, University of Maryland, College Park, MD

Aug 2020 - Aug 2021

- Analyzed and published data on COVID-19 deaths across 57 countries and their relationship to social norms using multilevel statistical models
- Ran two experiments testing different nudges, or message framing effects, for wearing masks and forecasted the utility of these interventions
- Developed a natural language processing (NLP) Shiny app to detect threatening language and compare levels across texts (<https://www.michelegelfand.com/threat-dictionary>)

Writing Coach - University of Northern Iowa, Cedar Falls, IA

Aug 2017 - May 2020

- Coached students in writing and statistics, providing personalized guidance based on individual needs assessment to improve academic performance across diverse learning styles
- Trained new tutors and developed training materials to ensure consistent, effective tutoring practices and knowledge transfer across the team
- Conducted outreach in classrooms and registration events to promote tutoring services and connect students with academic support resources

Experience

- Applied evidence-based frameworks including Bloom's taxonomy and Csikszentmihalyi's flow state model to optimize student learning experiences
- Supported diverse student populations including English Language Learners and students with learning disabilities, adapting approaches to meet varied accessibility needs

Education

Master of Arts - Social Psychology - University of Northern Iowa, Cedar Falls, Iowa

2018 - 2020

- Completed courses Statistical Computing I and II in R programming
- Worked as a Research Assistant in the Psychoneuroendocrinology Lab
- Worked as a Teaching Assistant in undergraduate psychology courses (Introduction to Psychology, Biopsychology, and Psychology of Gender)
- Awarded research and travel funds from the university totaling \$1,800
- Thesis: "Challenging Social Systems Under the Threat of Pollution" (<https://scholarworks.uni.edu/etd/1028/>)

Bachelor of Arts - Psychology - University of Northern Iowa, Cedar Falls, Iowa

2014 - 2018

Publications

- Gelfand, M. J., Jackson, J. C., Pan, X., Nau, D., **Pieper, D.**, Denison, E., Dagher, M., Van Lange, P. A. M., Chiu C., & Wang, M. (2021).
